SUMMARY

Java Full Stack Developer with hands-on experience building CRUD-driven web applications end-to-end — from MySQL/JDBC data layers to Spring Boot services to MERN-stack frontends. Shipped a 5-module hospital management system and a 98.7%-accuracy CNN classifier independently. Looking to bring that same build-it-and-ship-it habit to an entry-level Software Developer role.

SKILLS

Languages: Core Java, JavaScript, SQL, HTML/CSS

Frameworks & Tools: Spring Boot, Node.js, Express.js, React.js, MongoDB, Eclipse, VS Code, Postman, Git/GitHub

Core Strengths: Data Structures & Algorithms, OOP, RESTful API Design, JDBC/MySQL

EXPERIENCE

Full Stack Development Intern — CodeClause *July 2025 – September 2025*

- Delivered a full-stack web application on the MERN stack (MongoDB, Express.js, React.js, Node.js) as measured by successful on-time project delivery, by integrating frontend, backend, and database layers within a 5-member Agile team.
- Improved team delivery cadence as measured by consistent mentor sign-off on milestones, by presenting progress reports and incorporating mentor feedback into iterative builds.

PROJECTS

Hospital & Patient Management Portal *Core Java, JDBC, MySQL, HTML/CSS/JS*

- Built a hospital management system supporting patient registration, doctor management, and appointment booking, as measured by successful CRUD operations across all modules, by designing a normalized MySQL schema and implementing JDBC-based data access.
- Increased application reliability as measured by elimination of unhandled runtime errors, by implementing structured exception handling and input validation across all user-facing modules.

Handwritten Digit Recognition *TensorFlow, Keras, CNN, Tkinter | April 2025 – May 2025*

- Achieved 98.7% classification accuracy on the MNIST dataset, as measured by test-set performance, by engineering and training a convolutional neural network with dropout regularization to reduce overfitting.
- Processed and prepared 70,000+ images for training, as measured by improved model generalization, by applying normalization, reshaping, and data augmentation techniques.

CERTIFICATIONS

HTML, CSS, JavaScript — Infosys Springboard (2025)

SIMULATIONS & WORKSHOPS

- Data Analytics Job Simulation — Deloitte (2025)
- Technology Consulting Job Simulation — Accenture (2025)
- Data Science using Python — Brainovision (2024)
- Application Development with AI — RGAN & AICTE (2025)

EDUCATION

Bachelor of Technology, CSE — Rise Krishna Sai Gandhi Group of Institutions, Ongole, India — CGPA: 8.0 (Nov 2022 – Apr 2026)

Intermediate (MPC) — Sri Sadhana Junior College, Markapur, India — CGPA: 8.9 (Jun 2020 – May 2022)
